

Don't Hog the Hedge! Hibernation Habitats

You will need:

- A paper plate
- A sheet of A4 paper (any colour)
- Various collage materials, tissue paper, real leaves, twigs, cotton wool, etc.
- Crayons/coloured pencils
- Glue

Instructions

1. Choose one of the animals from the Twinkl Original story 'Don't Hog the Hedge!' that you would like to make a hibernation home for. It could be a hedgehog, a toad, a dormouse, a bat or a queen bee.
2. Cut your paper plate in half.
3. Take one half of the paper plate and cut a small semicircle out of the middle of it.
4. Stick this onto your piece of paper (so the plate is face-down) so that it looks like a 3D cave.
5. Decorate the paper plate to make it look like the habitat your creature would hibernate in. For example, if you chose a hedgehog, decorate the plate so that it looks like a pile of dry leaves. You could stick real leaves and twigs over it.
6. Draw, colour or collage the background of the paper. You might like to create trees or hills, etc. You could even add cotton wool to make the scene look snowy.
7. Draw or collage your chosen creature and place it inside your paper plate habitat.
